Index of Articles for 1970

This Index lists all of the feature technical articles and directories that appeared in EID during 1970. Articles have been grouped into twelve categories, according to subject matter. Notice that many articles are listed two or more times, because they deal with subjects that are described by more than one of the twelve categories. Names of the authors of all bylined articles are presented in italics—without reference to company affiliation. When no author is named, the article was written by the EID Staff. Each entry identifies the 1970 issue in which the article appeared, and also the first page of the article.

Applying Computers to Instrumentation Systems

"Automated Testing of Complex Wiring Assemblies", by *Benjamin K. Cheng;* January, page 7.
"Computer-Aided Scientific Instrumentation", by *Theodore C. Gams;* March, page 58.
"Computer-Interfaced Instrumentation in the Development Laboratory", by *George Keats;* November, page 51.
"Matching the IC Test Facility to the Application Environment", by *Byron Brooks;* March, page 7.
"Selecting the Optimum Multi-Path Digital-to-Analog Configuration", by *Daniel H. Sheingold;* July, page 6.
"Signal Conditioning for Analog-to-Digital Conversion in Instrumentation Systems", by *James V. DiRocco;* May, page 7.
"Survey of Analog and Hybrid Computers and Accessories"; May, page 28.
"The Use of Correlation and Statistical Analysis in Instrumentation", by *Peter J. Garforth;* August, page 7.
"Using a Digital Computer for On-Line Averaging of Low-Level Evoked Responses", by *LeRoy T. Dunnington;* February, page 7.

Calibration and Standardization

"A New 8-Place DC Potentiometer for High-Volume Testing of Linear Components", by *Loebe Julie;* October, page 46.
"A Precision AC Current Source" by *Kenneth J. Koep;* June, page 50.
"Generating and Measuring a Nanoampere-Level Square Wave", by *Eldred F. Tubbs;* March, page 41.
"High-Precision Flatness Measurement for Production-Test Applications", by *A. P. Deshpande;* November, page 17.
"Microsecond Timekeeping by Means of Multiple-Frequency VLF Reception", by *O. J. Baltzer;* December, page 75.
"Reappraising the Zener Diode as a Reference and Transport Standard", by *Woodward G. Eicke, Jr.;* May, page 50.
"Recent Developments in AC Metrology", by *Ian Malcom;* April, page 51.
"Standardization of a Farad", by *Henry P. Hall;* August, page 25.
"The Role of Statistics in Measurement", by *Carroll G. Hughes, III;* September, page 20.
"Transducer Techniques: Determining the Errors of Working Thermocouples, & In-Place Calibration of Linear-Motion Transducers", by *Paul J. Gibilisco;* February, page 19.

Digital/Analog Systems and Components

"Automated Testing of Complex Wiring Assemblies", by *Benjamin K. Cheng;* January, page 7.
"Choosing an Appropriate BCD Code"; February, page 46.
"Computer-Aided Scientific Instrumentation", by *Theodore C. Gams;* March, page 58.
"Computer-Interfaced Instrumentation In the Development Laboratory", by *George Keats;* November, page 51.
"DVM's Generate Kickback Pulses!", by *Richard N. Schowengerdt & Marke Solle;* June, page 36.
"Digital Instrumentation Applications Roundup", February, page 59.
"A Guide to the Applications Literature on Electronic Instrumentation"; 5th Edition, April, page 33; 6th Edition, October, page 35.
"High-Precision Flatness Measurement for Production-Test Aplications", by *A. P. Deshpande;* November, page 17.
"Modern Analog-to-Digital Converters for Instrumentation Systems", by *John O. Bowers;* November, page 7.
"Modern Monolithic Modules for D-to-A Systems Applications", by *John O. Bowers;* September, page 8.
"Power Supplies for Computer-Controlled Instrumentation Systems", by *Brett M. Nordgren;* December, page 7.
"Selecting the Optimum Multi-Path Digital-to-Analog Configuration", by *Daniel H. Sheingold;* July, page 6.
"Signal Conditioning For Analog-to-Digital Conversion in Instrumentation Systems", by *James V. DiRocco;* May, page 7.
"Survey of Analog and Hybrid Computers and Accessories"; May, page 28.
"The Use of Correlation and Statistical Analysis in Instrumentation", by *Peter J. Garforth;* August, page 7.
"Using a Digital Computer for On-Line Averaging of Low-Level Evoked Responses", by *LeRoy T. Dunnington;* Februrary, page 7.

Journal of the Precision Measurements Association

"A New 8-Place DC Potentiometer for High-Volume Testing of Linear Components", by *Loebe Julie;* October, page 46.
"A Precision AC Current Source", by *Kenneth J. Koep;* June, page 50.
"High-Precision Flatness Measurement for Production Test Applications", by *A. P. Deshpande;* November, page 17.
"Microsecond Timekeeping by Means of Multiple-Frequency VLF Reception", by *O. J. Baltzer;* December, page 75.
"Reappraising the Zener Diode as a Reference and Transport Standard", by *Woodward G. Eicke, Jr.;* May, page 50.
"Recent Developments in AC Metrology", by *Ian Malcom;* April, page 51.
"Standardization of a Farad", by *Henry P. Hall;* August, page 25.
"The Role of Statistics in Measurement", by *Carroll G. Hughes, III;* September, page 20.
"True Long-Term, Low-Level Acceleration Measurement", by *David N. Meinecke;* July, page 28.

Measuring Physical, Mechanical, and Other Phenomena

"A Guide to the Applications Literature on Electronic Instrumentation", 5th Edition, April, page 33; 6th Edition, October, page 35.
"High-Precision Flatness Measurement for Production Test Applications", by *A. P. Deshpande;* November, page 17.
"Stepped-Sweep Generator", by *Everett J. Aho;* January, page 51.
"The Silent Switch", by *Neil Hakko;* March, page 42.
"True Long-Term, Low-Level Acceleration Measurement", by *David N. Meinecke;* July, page 28.

Miscellaneous

"A Guide to the Applications Literature on Electronic Instrumentation"; 5th Edition, April, page 33; 6th Edition, October, page 35.
"Survey of Microwave Instruments"; April, page 15.
"The Matrix Program Board—Convenience or Confusion?", by *Dean E. Oderkirk;* April, page 6.
"Who Makes Instruments?" (Directory); December, page 13.

New or Unusual Instrumentation Techniques

"A Guide to the Applications Literature on Electronic Instrumentation", 5th Edition, April, page 33; 6th Edition, October, page 35.
"A Simple Automatic Method for Determining Curie Temperatures", by *J. R. Depew, A. Grady, Jr., & J. H. Judy;* October, page 18.
"CRO Applications Roundup"; January, page 45.
"Filter Performance Enhanced by Means of Non-Linear Elements", by *Donald J. Savage;* August, page 19.
"Generating and Measuring a Nanoampere-Level Square Wave", by *Eldred F. Tubbs;* March, page 41.
"High-Precision Flatness Measurement for Production-Test Applications", by *A. P. Deshpande;* November, page 17.
"Microsecond Timekeeping by Means of Multiple-Frequency VLF Reception", by *O. J. Baltzer;* December, page 75.
"Noise Figure vs Conversion Loss", by *Robert H. Sproul;* March, page 20.
"Pulse and Function–Generator Applications Roundup"; June, page 23.
"Standardization of a Farad", by *Henry P. Hall;* August, page 25.
"Stepped-Sweep Generator", by *Everett J. Aho;* January, page 51.
"Transducer Techniques: Determining the Errors of Working Thermocouples, & In-Place Calibration of Linear-Motion Transducers", by *Paul J. Gibilisco;* February, page 19.
"Using a Digital Computer for On-Line Averaging of Low-Level Evoked Responses", by *LeRoy T. Dunnington;* February, page 7.

Observing and Recording Electrical Parameters and Waveforms

"A Simple Automatic Method for Determining Curie Temperatures", by *J. R. Depew, A. Grady, Jr., & J. H. Judy;* October, page 18.
"CRO Applications Roundup"; January, page 45.
"Microsecond Timekeeping by Means of Multiple-Frequency VLF Reception", by *O. J. Baltzer;* December, page 75.
"Multi-Color Display Enhances Oscilloscope Versatility", by *David L. Welling;* July, page 37.
"Stepped-Sweep Generator", by *Everett J. Aho;* January, page 51.

Performance Analysis of Instruments and Components

"A New 8-Place DC Potentiometer for High-Volume Testing of Linear Components", by *Loebe Julie;* October, page 46.
"A Precision AC Current Source", by *Kenneth J. Koep;* June, page 50.
"Accuracy of Operational-Amplifier Integrators", by *Eliezer Y. Shapiro;* May, page 19.
"Achieving Versatility with Modern Function Generators", by *L. Wayne Hunter;* October, page 7.
"DVM's Generate Kickback Pulses!", by *Richard N. Schowengerdt & Marke Solle;* June, page 36.
"Filter Performance Enhanced by Means of Non-Linear Elements", by *Donald J. Savage;* August, page 19.
"Multi-Color Display Enhances Oscilloscope Versatility", by *David L. Welling;* July, page 37.
"Power-Supply Finder"; February, page 25; September, page 33.
"Recent Developments in AC Metrology", by *Ian Malcom;* April, page 51.
"The Matrix Program Board—Convenience or Confusion?", by *Dean E. Oderkirk;* April, page 6.
"The Silent Switch", by *Neil Hakko;* March, page 42.
"True Long-Term, Low-Level Acceleration Measurement", by *David N. Meinecke;* July, page 28.

RF and Microwave Measurements

"Determination of Radiated RF Power Density", by *James L. Grissom;* September, page 61.
"Microsecond Timekeeping by Means of Multiple-Frequency VLF Reception", by *O. J. Baltzer;* December, page 75.
"Survey of Microwave Instruments"; April, page 15.
"Swept-Frequency Attenuation Measurements of Coaxial Transmission Lines", by *Timothy M. Abbott;* June, page 6.
"VSWR & TDR Applied to Transmission-Line Measurements", by *Timothy M. Abbott;* January, page 29.

Statistical Techniques, Applied to Measurements

"Reappraising the Zener Diode as a Reference and Transport Standard", by *Woodward G. Eicke, Jr.;* May, page 50.
"The Role of Statistics In Measurement", by *Carroll G. Hughes III;* September, page 20.
"The Use of Correlation and Statistical Analysis in Instrumentation", by *Peter J. Garforth;* August, page 7.
"Using A Digital Computer for On-Line Averaging of Low-Level Evoked Responses", by *LeRoy T. Dunnington;* February, page 7.

Testing Materials, Components, Modules, and Subsystems

"A Simple Automatic Method for Determining Curie Temperatures", by *J. R. Depew, A. Grady, Jr., & J. H. Judy;* October, page 18.
"Automated Testing of Complex Wiring Assemblies", by *Benjamin K. Cheng;* January, page 7.
"DVM's Generate Kickback Pulses!", by *Richard N. Schowengerdt & Marke Solle;* June, page 36.
"Matching the IC Test Facility to the Application Environment", by *Byron Brooks;* March, page 7.
"Noise Figure vs Conversion Loss", by *Robert H. Sproul;* March, page 20.
"Pulse and Function–Generator Applications Roundup"; June, page 23.
"Reappraising the Zener Diode as a Reference and Transport Standard", by *Woodward G. Eicke, Jr.;* May, page 50.
"Standardization of a Farad", by *Henry P. Hall;* August, page 25.
"Swept-Frequency Attenuation Measurement of Coaxial Transmission Lines", by *Timothy M. Abbott;* June, page 6.
"The Real-Time Accumulator", by *William H. Houghtaling;* January, page 18.
"The Role of Statistics in Measurement", by *Carroll G. Hughes III;* September, page 20.
"VSWR & TDR Applied to Transmission-Line Measurements", by *Timothy M. Abbott;* January, page 29.
